NEWS Swine Influenza (Flu)

PureGreen24 Meets CDC's Recommendation for Infection Control for Care of Patients with Confirmed or Suspected Swine Influenza A (H1N1) Virus in both Home and Healthcare Settings

NEW YORK, NY, April 26, 2009—Pure Green, LLC, and Distributors of PureGreen24, confirmed today that PureGreen24, powered by SDC, meets the recommendations by the United States Center for Disease Control (CDC) for infection control for care of patients with confirmed or suspected Swine Influenza A (H1N1) virus in both home and healthcare settings.

According to the CDC, person-to-person transmission of flu occurs mainly through coughing or sneezing of people infected with the influenza virus. People may become infected by touching something with the flu viruses on it and then touching their mouths or noses.

Guidance published by the CDC on April 24, 2009 for infection control in healthcare settings advises that “disinfection strategies used during influenza seasons can be applied to the environmental management of swine influenza.” Additional guidance published on April 25, 2009 for infection control in the home recommends keeping “surfaces (especially bedside tables, surfaces in the bathroom, and toys for children) clean by wiping them down with a household disinfectant according to directions on the product label.”

PureGreen24's SDC-based (silver dihydrogen citrate) disinfectant has been registered by the EPA specifically for use on children's toys, cribs, high chairs and other sensitive areas of the home as well as for use on hard surfaces in multitudes of environments, including hospitals, schools and offices.

David Stetson, Co-Founder of Pure Green, LLC, stated, “PureGreen24 is effective against Influenza A. Should the current outbreak become pandemic, Pure Green, LLC has the capacity to react to the needs in the US and Puerto Rico, in volume supply, for our powerful disinfectant to federal and state governments, healthcare institutions, schools and consumers seeking to effectively stem the spread of swine flu.”

PureGreen24's broad spectrum disinfectant kills bacteria, viruses and fungi and is registered with the EPA under the trade name Axen30. Independent lab studies and the resulting EPA-registered claims document that PureGreen24 kills resistant strains of bacteria, including MRSA (Methicillin-resistant Staphylococcus aureus), and VRE (Vancomycin resistant Enterococcus faecium) and E-coli in just 2 minutes. In addition, PureGreen24 provides a 30-second kill and 24-hour residual protection against Staphylococcus aureus, Pseudomonas aeruginosa, Salmonella choleraesuis. Notable viral efficacy claims for PureGreen24's disinfectant include a 10-minute kill against Norovirus, Human Influenza A and Rhinovirus. Moreover, PureGreen24 is odorless, colorless, non-corrosive, non-flammable and is compatible with other disinfecting and cleaning chemicals.

About Good Green Products, Inc. DBA GoGlo Home Products

Good Green Products, Inc. is the parent company of GoGlo Home Products a distributor of natural, non-toxic cleaning products located in Lake Stevens, WA. GoGlo Home Products has been distributing these products in the Northwest for approximately 15 years and concentrates it's efforts in supplying industrial strength Green Cleaning Products which would not be normally available to the general public. See our full product line by visiting our web site at www.GoGlo.com.
